The Making of Indigeneity, Curriculum History, and the Limits of Diversity Dec 05 2020 Conceptually rich and grounded in cutting-edge research, this book addresses the often-overlooked roles and implications of diversity and indigeneity in curriculum. Taking a multidisciplinary approach to the development of teacher education in Guatemala, López provides a historical and transnational understanding of how "indigenous" has been negotiated as a subject/object of scientific inquiry in education. Moving beyond the generally accepted "common sense" markers of diversity such as race, gender, and ethnicity, López focuses on the often-ignored histories behind the development of these markers, and the crucial implications these histories have in education - in Guatemala and beyond - today.

A 50 Year History of Social Diversity at the University of Michigan Nov 27 2022 The University of Michigan was established in 1817 in the village of Detroit by an act of the Northwest Territorial government and named through the sale of Indian lands granted by the United States Congress. Since it benefited from this territorial land grant, the new university was subject to the Enlightenment themes of the Northwest Ordinance guaranteeing civil rights and religious freedom. Envisioned by the people of the Michigan Territory as truly public, Michigan became the first university in America to successfully resist sectarian control. Buoyed by committed students, faculty, staff, and the citizens of our state, the University of Michigan has consistently been at the forefront of higher education, grappling with the difficult issues of plurality and promoting equality.

**Religious Life in Poland** Sep 01 2020 This book provides a concise historical outline of religion in Poland up until its entry into the European Union in 2004, together with a longer presentation of contemporary religious issues. Albeit largely mono-ethnic and overwhelmingly Catholic after the loss of its large Jewish population to the Holocaust, and subsequent post-World War II border shifts, traces of an historic diversity remain in Poland to date, playing a greater role than mere numbers would suggest. Poland's fairly robust religious life is affected by the country's continuing modernization and its various institutions, and this is discussed within a broad context. One of the unfortunate legacies of decades of communism is a stunted civil society; while at different levels there are conflicts involving religion, at the grassroots it is one of the few forces building much needed trust in present-day Polish society.

**The Historical Practice of Diversity** Feb 16 2022 While multicultural composition of nations has become a catchword in public debates, few educators, not to speak of the general public, realize that cultural interaction was the rule throughout history. Starting with the Islam-Christian-Jewish Mediterranean world of the early modern period, this volume moves to the empires of the 18th and 19th centuries and the African Diaspora of the Black Atlantic. It ends with questioning assumptions about citizenship and underlying homogeneous "received" cultures through the analysis of the changes in various literatures. This volume clearly shows that the life-worlds of settled as well as migrant populations in the past were characterized by cultural change and exchange whether conflictual or peaceful. Societies reflected on such change in their literatures as well as in their concepts of citizenship.

*Speaking of Alabama* Nov 03 2020 Informative and entertaining essays on the accents, dialects, and speech patterns particular to Alabama Thomas E. Nunnally's fascinating volume presents essays by linguists who examine with affection and curiosity the speech varieties occurring both past and present across Alabama. Taken together, the accounts in this volume offer an engaging view of the major features that characterize Alabama's unique brand of southern English. Written in an accessible manner for general readers and scholars alike, *Speaking of Alabama* includes such subjects as the special linguistic features of the Southern drawl, the "phonetic divide" between north and south Alabama, "code-switching" by African American speakers in Alabama, pejorative attitudes by Alabama speakers toward their own native speech, the influence of foreign languages on Alabama speech to the vibrant history and continuing influence of non-English languages in the state, as well as ongoing changes in Alabama's dialects. Adding to these studies is a foreword by Walt Wolfram and an afterword by Michael B. Montgomery, both renowned experts in southern English, which place both the methodologies and the findings of the volume into their larger contexts and point researchers to needed work ahead in Alabama, the South, and beyond. The volume also contains a number of useful appendices, including a guide to the sounds of Southern English, a glossary of linguistic terms, and online sources for further study. Language, as presented in this collection, is never abstract but always examined in the context of its speakers' day-to-day lives, the driving force for their communication needs and choices. Whether specialist or general reader, Alabamian or non-Alabamian, all

readers will come away from these accounts with a deepened understanding of how language functions between individuals, within communities, and across regions, and will gain a new respect for the driving forces behind language variation and language change.

Diversity and Division in Medicine May 10 2021 This is an innovative investigation of pluralism in health care. Using both extensive archival material and oral histories it examines relationships between indigenous healing, missionary medicine, and 'western' biomedicine. The book includes the different regions within South Africa although focusing in most detail on the Cape, the earliest area of white settlement. In a wide-ranging survey the division in medicine between 'western' and indigenous medicine is analysed through an exploration of the evolving practices of healers, missionaries, doctors and nurses. The book considers the extent to which there was a strategic crossing of boundaries in the construction of hybrid practices by these practitioners, and the extent to which patients pursued health by sampling diverse care options. Starting with missionary penetration during the early nineteenth century, the volume outlines interventions by the colonial state in medicine and public health, and the continued resilience of indigenous healing in the face of this. The book ends by relating past to present in scrutinising the legacy of historical structures - including those of the apartheid state - for current health care, and in briefly discussing the huge challenges that the HIV/Aids pandemic poses in impacting on them. The book thus provides an inclusive history of medicine for the 'New' South Africa.

**American Christianities** Oct 27 2022 From the founding of the first colonies until the present, the influence of Christianity, as the dominant faith in American society, has extended far beyond church pews into the wider culture. Yet, at the same time, Christians in the United States have disagreed sharply about the meaning of their shared tradition, and, divided by denominational affiliation, race, and ethnicity, they have taken stances on every side of contested public issues from slavery to women's rights. This volume of twenty-two original essays, contributed by a group of prominent thinkers in American religious studies, provides a sophisticated understanding of both the diversity and the alliances among Christianities in the United States and the influences that have shaped churches and the nation in reciprocal ways. *American Christianities* explores this paradoxical dynamic of dominance and diversity that are the true marks of a faith too often perceived as homogeneous and monolithic. *Santa Cruz Island* Oct 03 2020 For the first time a thorough history of Santa Cruz Island's tumultuous past is provided. The Making of Indigeneity, Curriculum History, and the Limits of Diversity Apr 08 2021 Conceptually rich and grounded in cutting-edge research, this book addresses the often-overlooked roles and implications of diversity and indigeneity in curriculum. Taking a multidisciplinary approach to the development of teacher education in Guatemala, López provides a historical and transnational understanding of how "indigenous" has been negotiated as a subject/object of scientific inquiry in education. Moving beyond the generally accepted "common sense" markers of diversity such as race, gender, and ethnicity, López focuses on the often-ignored histories behind the development of these markers, and the crucial implications these histories have in education - in Guatemala and beyond - today.

*Other Souths* Mar 08 2021 *Other Souths* collects fifteen innovative essays that place issues of race, class,

gender, ethnicity, and sexuality at the center of the narrative of southern history. Using a range of methodologies and approaches, contributing historians provide a fresh perspective to key events and move long-overlooked episodes into prominence. Pippa Holloway edited the volume using a chronological and event-driven framework with which many students and teachers will be familiar. The book covers well-recognized topics in American history: wars, reform efforts, social movements, and political milestones. Cultural topics are considered as well, including the development of consumer capitalism, the history of rock and roll, and the history of sport. The focus and organization of the essays underscore the value of southern history to the larger national narrative. *Other Souths* reveals the history of what may strike some as a surprisingly dynamic and nuanced region--a region better understood by paying closer and more careful attention to its diversity.

*Empires and Diversity* May 29 2020 For more than four thousand years, empires have been geographically the largest polities on Earth, shaping in many respects the human past and present in different epochs and on different continents. Covering the time span from the second millennium B.C.E. to the sixteenth century C.E., and geographic areas from China to South America, the case studies included in this volume demonstrate the necessity to combine perspectives from the *longue duree* and global comparativism with the theory of agency and an understanding of specific contexts for human actions. Contributions from leading scholars examine salient aspects of the Hittite, Assyrian, Ancient Egyptian, Achaemenid and Sasanian Iranian, Zhou to Han Dynasty Chinese, Inka, and Mughal empires.

*Immigration and American Diversity* Oct 15 2021 This engaging textbook is a concise overview of a sweeping topic - American Immigration. Immigration is core to the history of America - a "Nation of Immigrants" who are diverse by definition. **On Diversity** Apr 28 2020 A brilliant examination of a timely concept from one of the nation's great public intellectuals. Diversity. You've heard the term everywhere--in the news, in the universities, at the television awards shows. Maybe even in the corporate world, where diversity initiatives have become *de rigueur*. But what does the term actually mean? Where does it come from? What are its intellectual precedents? Moreover, how do we square our love affair with diversity with the fact that the world seems to be becoming more and more, well, homogeneous? With a lucid, straightforward prose that rises above the noise, one of America's greatest intellectual gadflies, Russell Jacoby, takes these questions squarely on. Discussing diversity (or lack thereof) in language, fashion, childhood experience, political structure, and the history of ideas, Jacoby offers in plain language a surprising and penetrating analysis of our cultural moment. In an age where our public thinkers seem to be jumping over one another to have the latest correct opinion, Jacoby offers a most dangerous, and liberating, injunction: to stop and think.

*Flying - Not Just for White Guys* Nov 23 2019 The aeronauts, aviators and astronauts featured in this book not only had to overcome the force of gravity but, also, the forces of bias and discrimination present in the societies and times in which they lived. These are the stories of ceilings broken and should serve as a checklist for the next generation of flyers who will need to be just that much better to continue the process and progress. I hope it serves as inspiration for today's pilots, engineers and educators to be the mentors and role models who will help our children navigate on this journey in the sky.

*Fix It* May 22 2022 Despite a long-standing commitment to diversity and inclusion, creating a more diverse

bar has been challenging for the legal profession. And this begs the question "why?" Does the profession find itself in the precarious position of having self-imposed barriers in place that work against its best efforts, are outside factors beyond the profession's control inhibiting progress, or is it a combination of the two? *Fix It: How History, Sports, and Education Can Inform Diversity, Inclusion, and Equity Today* cites historical and current references and the latest research to address these questions and much more.

I suggest solutions and ideas for interpretative planning to increase the representation of minority perspectives into the historical narrative of the site and include more ethnic and racial diversity among the employed costumed staff."--Page v.
