But have they returned too late... or too soon? L'immagine tipica che si ha dell'Arabia Saudita è quella di una persona in vestito tradizionale di fronte ad uno zampillo di petrolio che scaturisce dalla sabbia: un paese ricco, ma profondamente arretrato e privo di organi parlamentari elettivi, la cui carta costituzionale è rappresentata dalla Sharia e con un sistema giudiziario basato anch'esso sulla legge islamica. Ma se si vuole comprendere un grande paese dalle mille sfaccettature si deve avere una conoscenza più approfondita della sua storia, dei suoi costumi e della sua società, superando luoghi comuni e ignoranza. L'Arabia Saudita deve oggi affrontare sfide di straordinaria complessità, fra cui le richieste provenienti dal mondo femminile. In un paese dove oltre ventimila imprese sono di diretta proprietà di donne, arretrati meccanismi di controllo maschili non favoriscono un'efficiente conduzione degli affari e sono un ostacolo dannoso per tutta la società. Le nuove generazioni sfidano a loro volta gli assetti costituiti, compresi quelli religiosi, mettendo in discussione temi un tempo considerati tabù. Ksi?ga pami?tkowa dla Profesora Stanis?awa Stachowskiego z okazji jego 85 urodzin * * * A Festschrift for Professor Stanis?aw Stachowski on the Occasion of His 85th Birthday A unique look at how Futurism influenced and changed twentieth-century graphic design In the early decades of the twentieth century, European artists, poets, and designers called for the destruction of outdated assumptions about vision and language. Numerous manifestos resulted, demanding new artistic forms. None of these manifestos was more aggressive and poetic, or wider in scope than Filippo Tommaso Marinetti's Futurist Manifesto of 1909. Painting, sculpture, literature, architecture, theatre, cinema, and music were all caught up in its net. Typography--until then a distant relative in the arts--also played a major role in Marinetti's program. Written by leading design scholar Alan Bartram, this fascinating book examines the rise and evolution of the Futurists' approach to typography and graphic design, placing it within the context of contemporary artistic and literary movements. The volume features examples of some eighty Futurist books or other designs for print, many of them relatively unknown or previously unpublished, accompanied by new translations of over twenty of the featured texts. Bartram illuminates the complicated meanings of the Futurist designers' graphic works in order to provide a new understanding of their extraordinary and influential visual language. Diven era già lontano e stava raggiungendo il confine del regno. Vide il cielo specchiarsi nel Lago Azzurro, un incanto che lo riportò ai ricordi di quand'era piccolo. Respirò a pieni polmoni ed entrò nella foresta per inoltrarsi in percorsi a lui sconosciuti. Fu in quel momento che estrasse un piccolo pezzo di legno dalla tasca e alitando nell'aria fredda pronunciò: «Levisalto!». Il feragico prese forma all'istante. Con il bastone magico in pugno salì su un grande masso di roccia che spuntava tra il muschio. Dall'alto diede un ultimo sguardo a Cramville e si soffermò a fissare la cima del promontorio dove sorgeva imponente Rocca Herésia con la sua torre. «Tornerò, mamma, lo prometto» sussurrò al vento. «Certo, torneremo con le monete.» Diven si girò di scatto e da dietro il tronco di un grande albero vide sbucare Miriam. «Ti accompagnerò in questo viaggio pericoloso. Te lo devo» disse la yantia. Età di lettura: da 10 anni. PCMag.com is a leading authority on technology, delivering Labs-based, independent reviews of the latest products and services. This volume explores the dialogue between Arab media and global developments in the information age, looking at the influence of new technologies in Arab societies and the evolving role of Arab women in 'old' and 'new' media. By gathering together contributions from both Arab and non-Arab scholars alike, a timely and important collection is presented that sheds new light on the growing involvement, role and image of Arab women in the media. First published in 1914, this title was the first comparative study of the marriage ceremonies in different parts of Morocco. Westermarck considers how ceremonial customs and rituals differ across social and cultural groups throughout the country and discusses their possible roots. Based on extensive primary research, visiting many of the tribes and places mentioned in the book, this is a really fascinating title of great value to students of sociology and cultural anthropology with an interest in the foundations of the marriage ceremony. *This first edition of this fantasy novel is published in the Italian language.* Questa fantastica storia avvincente avviene in un Mondo parallelo al nostro, dove i popoli sono ormai in guerra, perchè la Regina dei diamanti è stata rapita da Aragon, uno stregone malvagio, che vuole conquistare sia il cuore della regina che il suo "Cuore dei Diamanti". la pietra più preziosa e magica che esiste. Less than 30% of the projects that are developed in the minerals industry yield the return on investment that was projected from the project feasibility studies. The tools described in this handbook will greatly improve the probability of meeting your projections and minimizing project execution capital cost blowout that has become so prevalent in this industry in recent years. Mineral Property Evaluation provides guidelines to follow in performing mineral property feasibility and evaluation studies and due diligence, and in preparing proper documents for bankable presentations. It highlights the need for a consistent, systematic methodology in performing evaluation and feasibility work. The objective of a feasibility and evaluation study should be to assess the value of the undeveloped or developed mineral property and to convey these findings to the company that is considering applying technical and physical changes to bring the property into production of a mineral product. The analysis needs to determine the net present worth returned to the company for investing in these changes and to reach that decision point as early as possible and with the least amount of money spent on the evaluation study. All resources are not reserves, nor are all minerals an ore. The successful conclusion of any property evaluation depends on the development, work, and conclusions of the project team. The handbook has a diverse audience: • Professionals in the minerals industry that perform mineral property evaluations. • Companies that have mineral properties and perform mineral property feasibility studies and evaluations or are buying properties based on property evaluation. • Financial institutions, both domestic and overseas, that finance or raise capital for the minerals industry. • Consulting firms and architectural and engineering contractors that utilize mineral property feasibility studies and need standards to follow. • And probably the most important, the mining and geological engineering students and geology and economic geology students that need to learn the standards that they should follow throughout their careers. "Following on the successes of two previous dictionary projects, the CRC World Dictionary of Plant Names and the CRC World Dictionary of the Grasses, Umberto Quattrocchi has undertaken this dictionary of economically important plants.... He has done for these plants what was so admirably done in his other works—brought the vast and scattered literature on plant names, and in this case, too, their uses, into coherent order so that the inquisitive scholar can get a foothold." —From the Foreword, Donald H. Pfister, Harvard University and Harvard University Herbaria, Cambridge, Massachusetts The CRC World Dictionary of Medicinal and Poisonous Plants: Common Names, Scientific Names, Eponyms, Synonyms, and Etymology provides the starting point for better access to data on plants used around the world in medicine, food, and cultural practices. The material found in the five volumes has been painstakingly gathered from papers of general interest, reports and records, taxonomic revisions, field studies, herbaria and herbarium collections, notes, monographs, pamphlets, botanical literature, and literature tout court. It includes sources available at various natural history libraries, floras and standard flora works, local floras and local histories, nomenclatural histories, and the International Code of Botanical Nomenclature. Much more than a dictionary, the book provides the names of thousands of genera and species of economically important plants, concise summaries of plant properties, and appropriate observations about medicinal uses. Drawing from a tremendous range of primary and secondary sources, it is an indispensable time-saving guide for all those involved with botany, herbal medicine, pharmacognosy, toxicology, medicinal and natural product chemistry, and agriculture. A hugely important book that solely and fully explores for the first time the complex partnership during World War II between FDR and Stalin, by the editor of *My Dear Mr. Stalin: The Complete Correspondence of Franklin D. Roosevelt and Joseph V. Stalin* ("History owes a debt to Susan Butler for the collection and annotation of these exchanges"—Arthur Schlesinger, Jr). Making use of previously classified materials from the Russian State Archive of Social and Political History, and the Archive of the Foreign Policy of the Russian Federation, as well as the Franklin D. Roosevelt Library and three hundred hot war messages between Roosevelt and Stalin, Butler tells the story of how the leader of the capitalist world and the leader of the Communist world became more than allies of convenience during World War II. Butler reassesses in-depth how the two men became partners, how they shared the same outlook for the postwar world, and how they formed an uneasy but deep friendship, shaping the world's political stage from the war to the decades leading up to and into the new century. Roosevelt and Stalin tells of the first face-to-face meetings of the two leaders over four days in December 1943 at Tehran, in which the Allies focused on the next phases of the war against the Axis Powers in Europe and Asia; of Stalin's agreement to launch another major offensive on the Eastern Front; and of his agreement to declare war against Japan following the Allied victory over Germany. Butler writes of the weeklong meeting at Yalta in February of 1945, two months before Roosevelt's death, where the unconditional surrender of Nazi Germany was agreed on and postwar Europe was reorganized, and where Stalin agreed to participate in Roosevelt's vision of the United Nations. The book makes clear that Roosevelt worked hard to win Stalin over, pursuing the Russian leader, always holding out the promise that Roosevelt's own ideas were the best bet for the future peace and security of Russia; however, Stalin was not at all sure that Roosevelt's concept of a world organization, even with police powers, would be enough to keep Germany from starting a third world war, but we see how Stalin's view of Roosevelt evolved, how he began to see FDR as the key to a peaceful world. Butler's book is the first to show how FDR pushed Stalin to reinstate religion in the Soviet Union, which he did in 1943; how J. Edgar Hoover derailed the U.S.-planned establishment of an OSS intelligence mission in Moscow and a Soviet counterpart in America before the 1944 election; and that Roosevelt had wanted to involve Stalin in the testing of the atomic bomb at Alamogordo, New Mexico. We see how Roosevelt's death deeply affected Stalin. Averell Harriman, American ambassador to the Soviet Union, reported that the Russian premier was "more disturbed than I had ever seen him," and said to Harriman, "President Roosevelt has died but his cause must live on. We shall support President Truman with all our forces and all our will." And the author explores how Churchill's—and Truman's—mutual mistrust and provocation of Stalin resulted in the Cold War. A fascinating, revelatory portrait of this crucial, world-changing partnership. This unique contribution to the growing field of western Indian Ocean studies brings new light and new perspective on the early 19th century expansion of both Omani Sultan and the British. The important role played by the Baluch in East Africa is here discussed thanks to little known archive documents integrated with field work. This volume brings together papers presented at the 7th Annual International Conference co-organised by Florence University of the Arts, Italy, and Stony Brook University (SUNY), USA. The contributors explored the many connections that define the Mediterranean Sea as a symbol of tradition and modernity, and examined it as a region capable of congregating, synergizing and transforming cultures. Their writings focus on the relationship between the cultural, social, and historical environment of Mare Nostrum to pinpoint the elements defining its identity. Hence, particular emphasis is placed on the role and relevance of the Mediterranean as the first beacon of multi-ethnicity which may be seen as a symbol of diversity and unity, as well as a model that

holds clues to understanding the global merging of cultures. As such, it is a real shame to see that the general interest in this unique and fascinating area has arisen not thanks to such highly positive features, but because, as Pope Francis says, it has become an open-air cemetery where thousands of people keep drowning. The multifaceted approach to this topic has resulted in the book being divided into four sections, covering the following thematic areas: Literature, History, Culture, and Identity. Reprint of the original, first published in 1890. Study of the African diaspora is now a dynamic field in the development of new methods and approaches to African history. This book brings together the latest research on African diaspora in Asia with case studies about India and the Indian Ocean islands.
